TO THOSE WHO READ THE DODO.....

A military institution has military channels. If they are closed to our complaints and blind to morale problems, the mission will be jeopardized. But if they are open to us and we say nothing, the mission has been already lost.

The Dodo is having a few problems, and no one should ask a twenty-one year old man to like something or to have spirit. I don't intend to do it.

We are through printing stagnant and insipid copies. "New and Different" will be the policy; we hope this new approach, which will require even more time, effort, and ingenuity will evoke some response; without your comments we cannot even assemble the material to be censored.

To the staff, whoever and wherever you are, GET HOT! To The Wing, best of luck with finals and beat hell outa leave. Merry Christmas from

The DODO Staff

Space Filler.

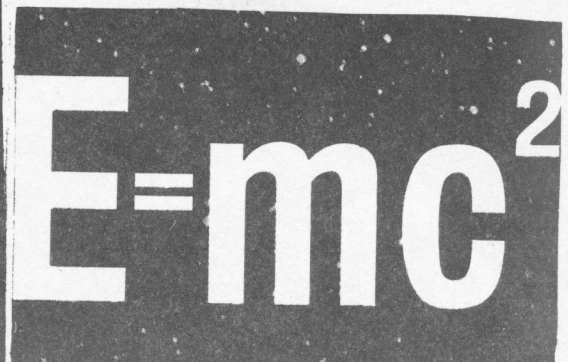

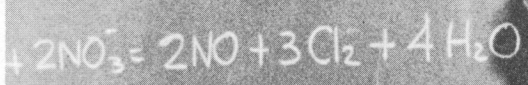

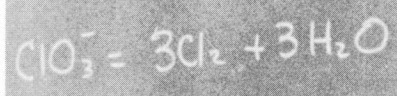

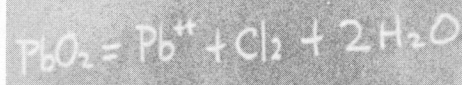

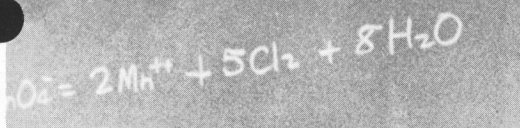

There, there, Nino. Everyone has to take a turnout now and then.....

Sure, the sled's all ready and we got plenty of these toy violins, bicycles, and woodburning sets, but where in hell am I going to get 2500 rear chin straps?

When in doubt...

I DON'T
LIKE YOUR
IDEA OF
EI.

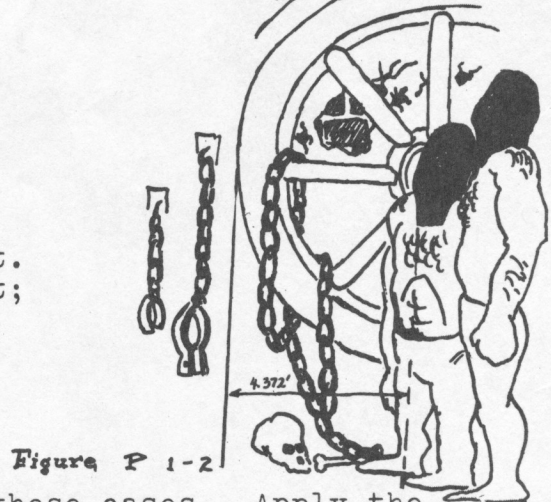

THE DCDO very recently took the pop final, in a certain popular course here, which could become a veritable classic. Being perennially interested in the arts and academics we have decided to reproduce, in part, this stirring work. Unoriginal, you say? We protest, unless this abhorable accusation be directed against those who have earned it, the academic departments, where only the answers are changed to protect the curve. In any contingency, here is the condensed (from 127 pages) version of this sweeping exposé of the cadet mind as seen by the Dean's Shop, just as it appeared on our desks this morning. For those of you who have not yet taken this quiz (1,473 pts.), this is not to be construed to be advance knowledge; there can't be any answers. There can't be...there can't be.....

1) In the RLC circuit shown, E is 14 volts, e is $147.3 \sin 28t$, $R_1=3.1$, $R_2=16$, $R_3=0$ to $17,000$, $R_4=R_5=1$. L is $4h$, $C_1=16$ f, C_2 is $1f$, and I_0 is unknown. If Sw_1 and Sw_2 are closed and Sw_3 is open at $t=0$, and Sw_1 is opened while Sw_2 and Sw_3 are closed at $t=0+$, calculate the natural response of the system in decibels.

2) Given the apparatus of Fig P 1-2, with a moment of 7200 ft-lb slowly applied to the wheel. The binding energy of the prisoner is between 1.6×10^{14} and 1.8×10^{15} Mev; his height changes linearly from 5'4" to 6'7" in the process, and his spring constant is 105 lb/ft. The radius of the wheel is 4.372 ft; the chains are three feet long and remain constant (disregard rust). Resolve, by vectors, the results of this turnout board. (Hint: the result will be a vector.)

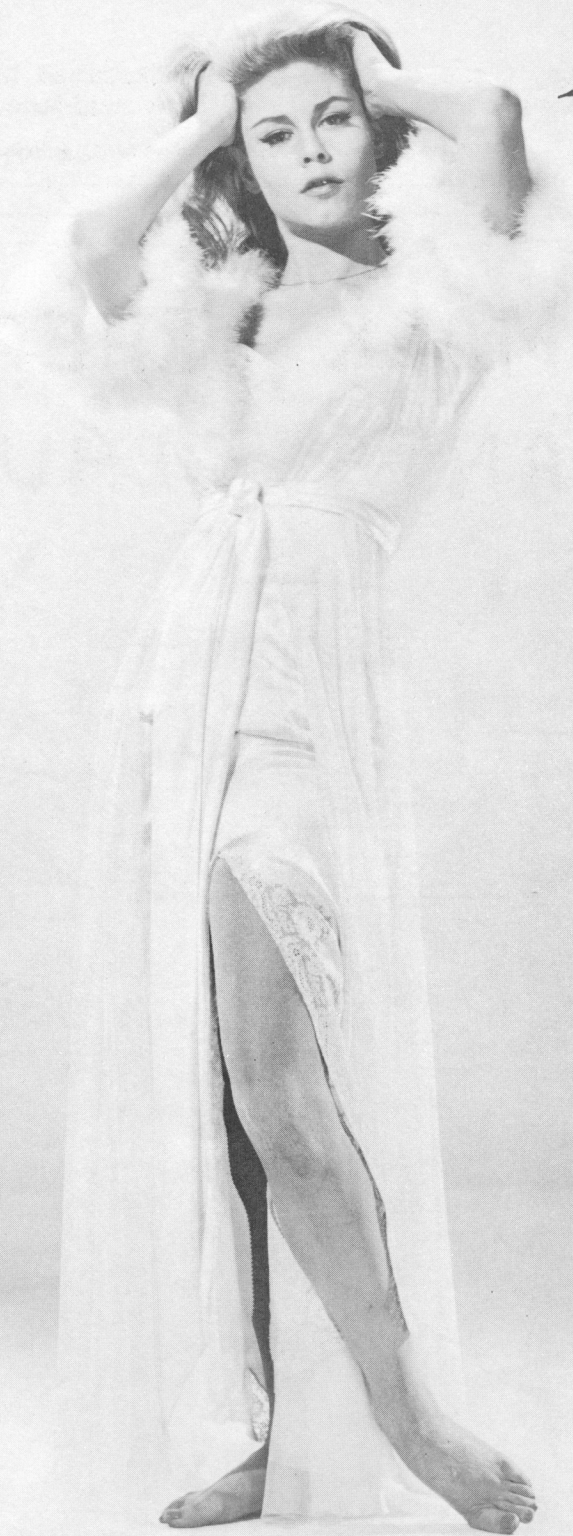

3) Assume no additional facts in these cases. Apply the majority rule in every case. Write true or false in the spaces provided. Suggested time: 3 minutes.

Facts for questions A. thru QQ. are as follows: Maniac wrongfully borrows Moneybags' new Stingray, without leaving a note, to seduce Zelda Baby. Moneybags, in attempting to catch Maniac, runs 14 Stop signs, 2 civilians, a tricycle, and a flock of geese. Policeman Gung Ho gives chase on his motorbike.

- _____ A. Who pays for the car wash?
- _____ B. The Stingray will win.
- _____ C. Assume Gung Ho, in detouring up the gangplank of the Andrea Doria, knocks Old Lady into the drink.

NEW YEAR'S
EVE PARTY?
WHAT NEW YEAR'S
EVE
PARTY??

HEADQUARTERS
UNITED STATES AIR FORCE ACADEMY
COLORADO

SPECIAL ORDER
TA-1967

11 December 1963

Following cadets, Class of 1967, are authorized to proceed on or about 20 Dec 63 on leave status to place of home residence for purposes of

~~AUTHORIZED: DEPARTS WITH AIR FORCE ACADEMY ON 12/20/63~~

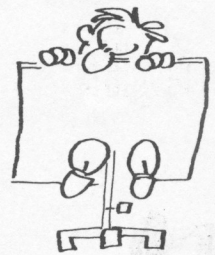

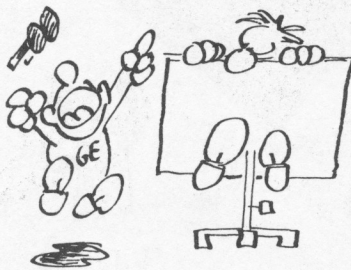

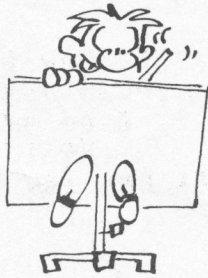

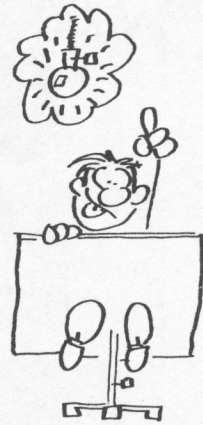

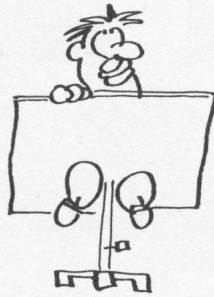

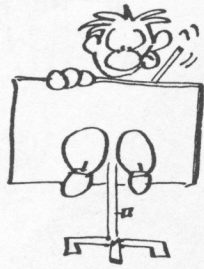

"YES, SMACK, THERE IS
A SANTA CLAUS!"

* "I was quite lucky, really...
it was the last hop out."

MELVIN! WHAT A SURPRISE...

GENERAL ECENTRICITY - 66

HE: Have you heard about the new college game?
 SHE: No, what is it?
 HE: Button, button, here comes the house mother.

Our Only Medicine

The Dodo

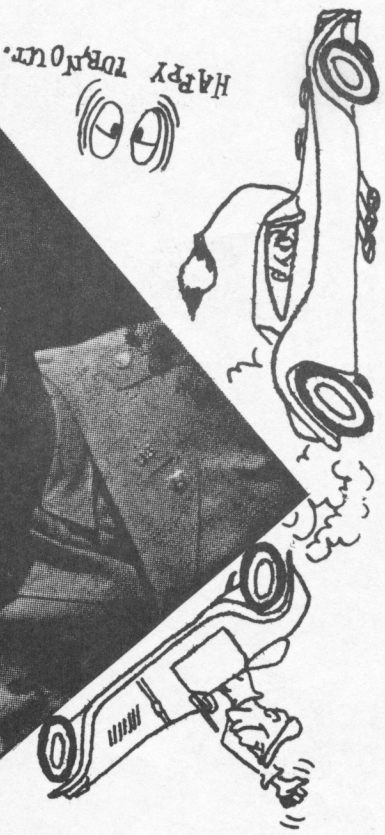

You see, his pal had lied. When Jack came back upon a midnight ride; Jack and Jill went up the hill

TO ALL STUDENTS:
 The President of the college and I have decided to stop necking on campus.

"Hey, knock it off! I've got a final tomorrow."

"Darling, I could sit here and do nothing but look at you forever."
 "That's what I'm beginning to think."

Every frosh likes to see a broad smile on campus, especially if she smiles at him.

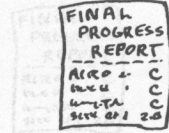

A CHRISTMAS STORY

"AND IT CAME TO PASS

THAT IN THOSE DAYS

THERE

WENT OUT A DECREE

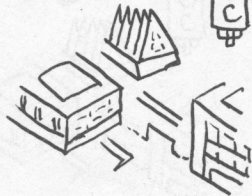

FROM

CAESAR AUGUSTUS

THAT THE

WHOLE WORLD

SHOULD BE

ENROLLED

....

AND ALL

...

WENT TO BE ENROLLED

,

EVERY ONE

IN HIS OWN

CITY

..
