A CADET PUBLICATION FOR CADETS

From the Editor:

Table 283 - "Old Shutdown"

I have recently returned to my squadron from remote duty aboard table 283. It is sorta hard to get used to finding something at your table besides a tourist having a picnic. When there's no tourist there to sponge off of you're really sick. Then you go door-to-door in Pine Valley. All kidding aside, 283 was the only table I've been on that you had to sign out on an ODP before marching over to the meal. I remember one day we were sitting there watching some buzzards circling and shaking off for the last of the catsup when I saw on the distant horizon what could have been a waiter! We had a waiter once but I guess the trip got to be too much for him. Anyway, we all jumped up and waved and yelled and threw some green leaves on the fire but it was no use. We sank down to dream of that far off day when the Admin officer would finally get hot and save us from starving out on "Old Shutdown".

"Greenbomb"

the Dodo Staff

OIC - MAJ. TURNER

EDITOR - GREENBOMB

ASS'T EDITOR - LLOYD DUNCAN

PHOTOS - JOHN RYDER

Typing - HANK MOORMAN

Ed. BUCHANAN

Kalla*

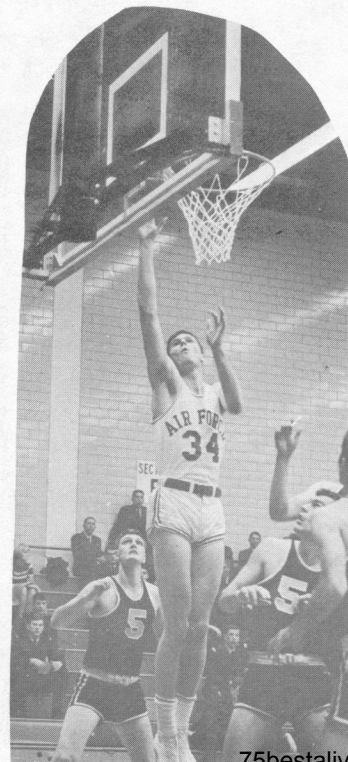

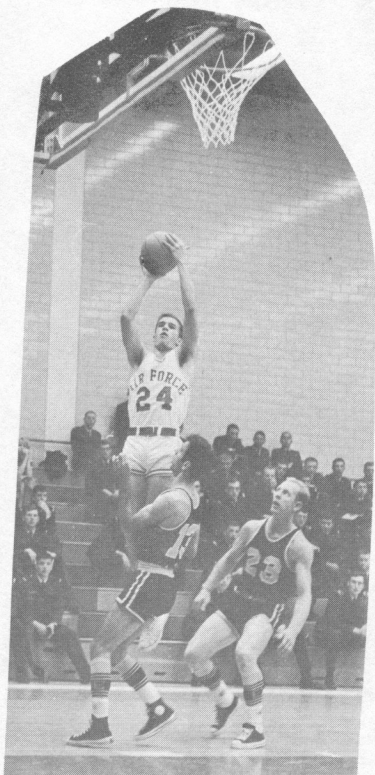

"THE TEAM"

The A.F.A. basketball team seems to have found itself after a 99 - 53 romp over Regis. The DODO staff expects many more victories like this in our remaining games.

(LEFT) A tremendous competitor, Pat Dowling, shoots for two more points. He will be missed for a while with an arm injury.

(RIGHT) Cliff Parsons, the AFA's answer to Lew Alcindor, drives for another bucket which helps him to remain the team's leading scorer.

A GREAT PHENOMENON OF OUR TIME :

the GUEST LECTURE

The Friday Evening International Affairs and Engineering Science lecture - a new concept: lectures with something for everybody.

TONITE:

"Laminar flow transition characteristics for Albanian submarine diving planes in subtropical waters."
(Clever - eh? - this is sure to keep IA majors as well as the engineers on the edge of their seats. We might even charge admission at the door.)

1.

30 seconds into the lecture

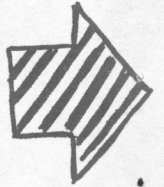

"You're probably wondering . . ."

2.

The Countdown

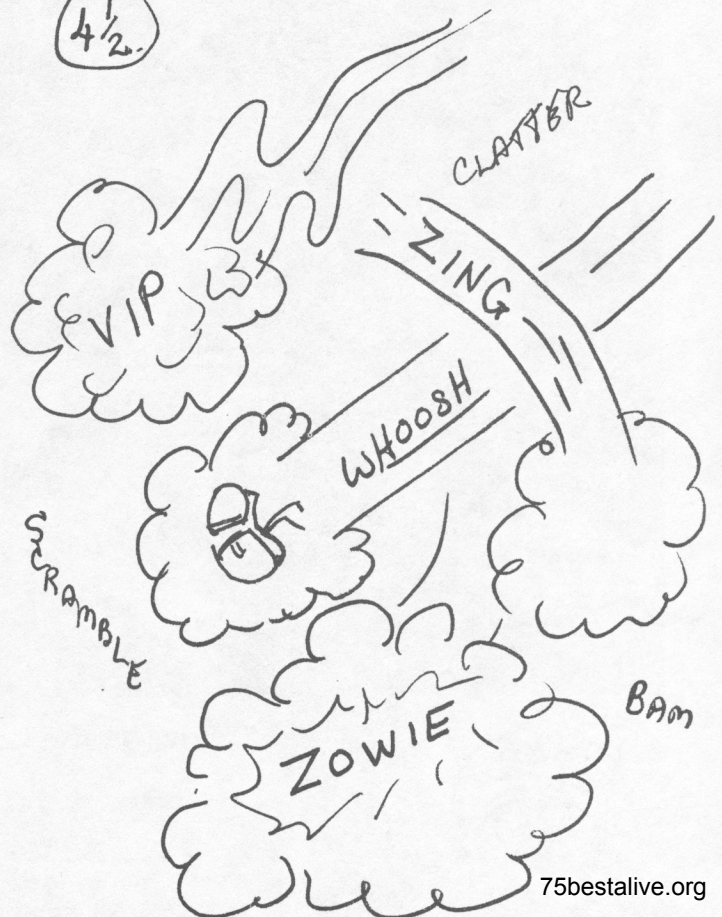

"...But I'll say more about that later..."

4.

He gets the hint.

4 1/2.

"That concludes my talk. I will..."

3.

They're getting restless!

"I'm running a little over, but . . ."

5.

The Question Period

. . . be glad to answer any questions."

AFA HOCKEY

OUR GANG - AREN'T THEY INNOCENT-LOOKING?

Hockey began at USAFA five years ago when several cadets in the Wing showed a remarkable aptitude for sticks and their aggressive uses on ice. A club was formed and a drive began for mean cadets with a desire to kill, plunder, etc. This drive was climaxed with the help of the Comm Shop's recommendation of several undesirables. These cadets found that serving time was much more fun than tours. (NOTE - see rules which follow) "Because of some selective recruiting in Chicago's East Side and the New York dock area Hockey will soon reach varsity status.

The DODO feels that when a cadet goes to watch a hockey game, he should have some idea of the rules, and the things that are being done on the ice. Therefore in the spirit of the DODO here are a few simple descriptions and regulations which must be known:

Puck - Round black slab strongly resembling a Mitchell Hall Woodcock. Often treated with the same respect.

Goal - Large moon shaped net which is the object of aggression on the ice. The goalie tries to keep the puck out of there.

Stick - Long crook shaped piece of wood with which players try to kill, plunder, maim, etc., each other during the course of the contest. An alternate use for it is striking the puck. The size of the stick depends wholly on the size of the man.

Icing the Puck - This occurs when one of the players on a team scrapes ice on top of the puck causing its temperature to drop below 0°. The puck is then dropped down the referee's back giving him the "cold shoulder."

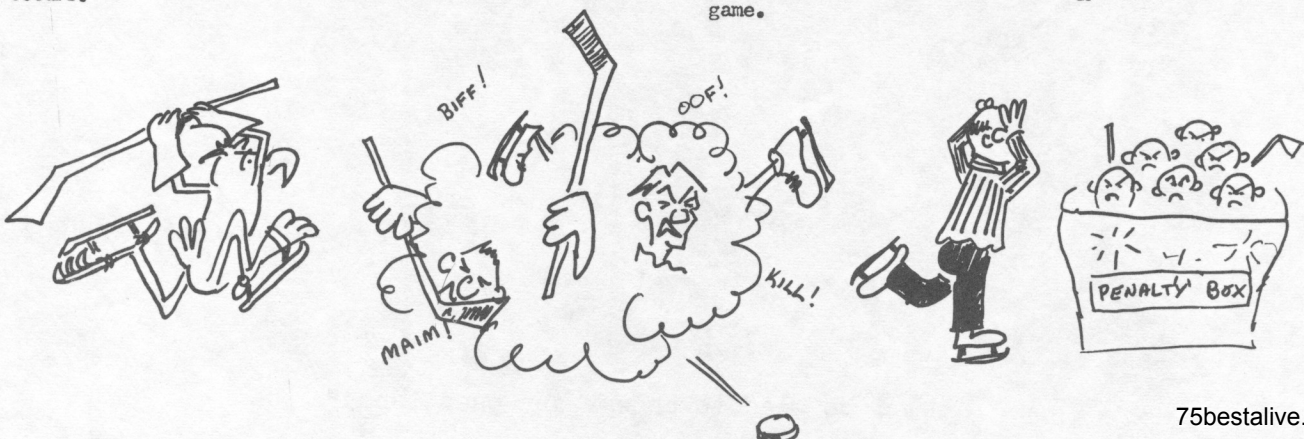

Delayed Whistle - Call made by referee when he has missed a play entirely. After the discovery of his mistake icing the puck usually occurs.

Puck out of Bounds - After icing the puck, the player responsible tries to get the puck out of bounds.

Penalty - Infraction of the regulations. The new classification system provides for a slap on the hands for a Class I offense, a crack on the mouth for a Class II and the Penalty Box for a Class III offense. Only 48 Class III's are permitted in one period.

Penalty Box - Area for those players who have received a penalty for causing an "accident" involving the infliction of great bodily harm with or without malice aforethought. This highly competitive honor is meted out usually in 2 and 5 minute increments. Only the most enthusiastic players may be admitted.

Face Off - Occurs when two opposing players have not been able to beat each other to a pulp. This takes place in back of the gym after the game.

"Aren't you getting tired of this bachelor life all the time, Bill?" asked his friend, Sach.

"Certainly not," replied Bill, "what was good enough for my father is good enough for me!"

Dads

Dots and Doodles

The girl from Louisiana was in the hospital for a check-up.

"Have you ever been X-rayed?"

"Nope, but Ah've been ultra-violated."

Heredity is when if your grandfather didn't have any children, and your father didn't have any children, then you won't have any children.

"Son, after four years at college you're nothing but a drunk, a loafer, and a darn nuisance. I can't think of one good thing it's done!"

The son was silent for a moment; then suddenly his eyes brightened. "Well," he said, "It's cured Ma of bragging about me!"

Definition of good, clean fun:

A couple taking a bath together!!

Veneral Disease has three effects:

First of all it makes you forgetful . . .
and I forget the other two.

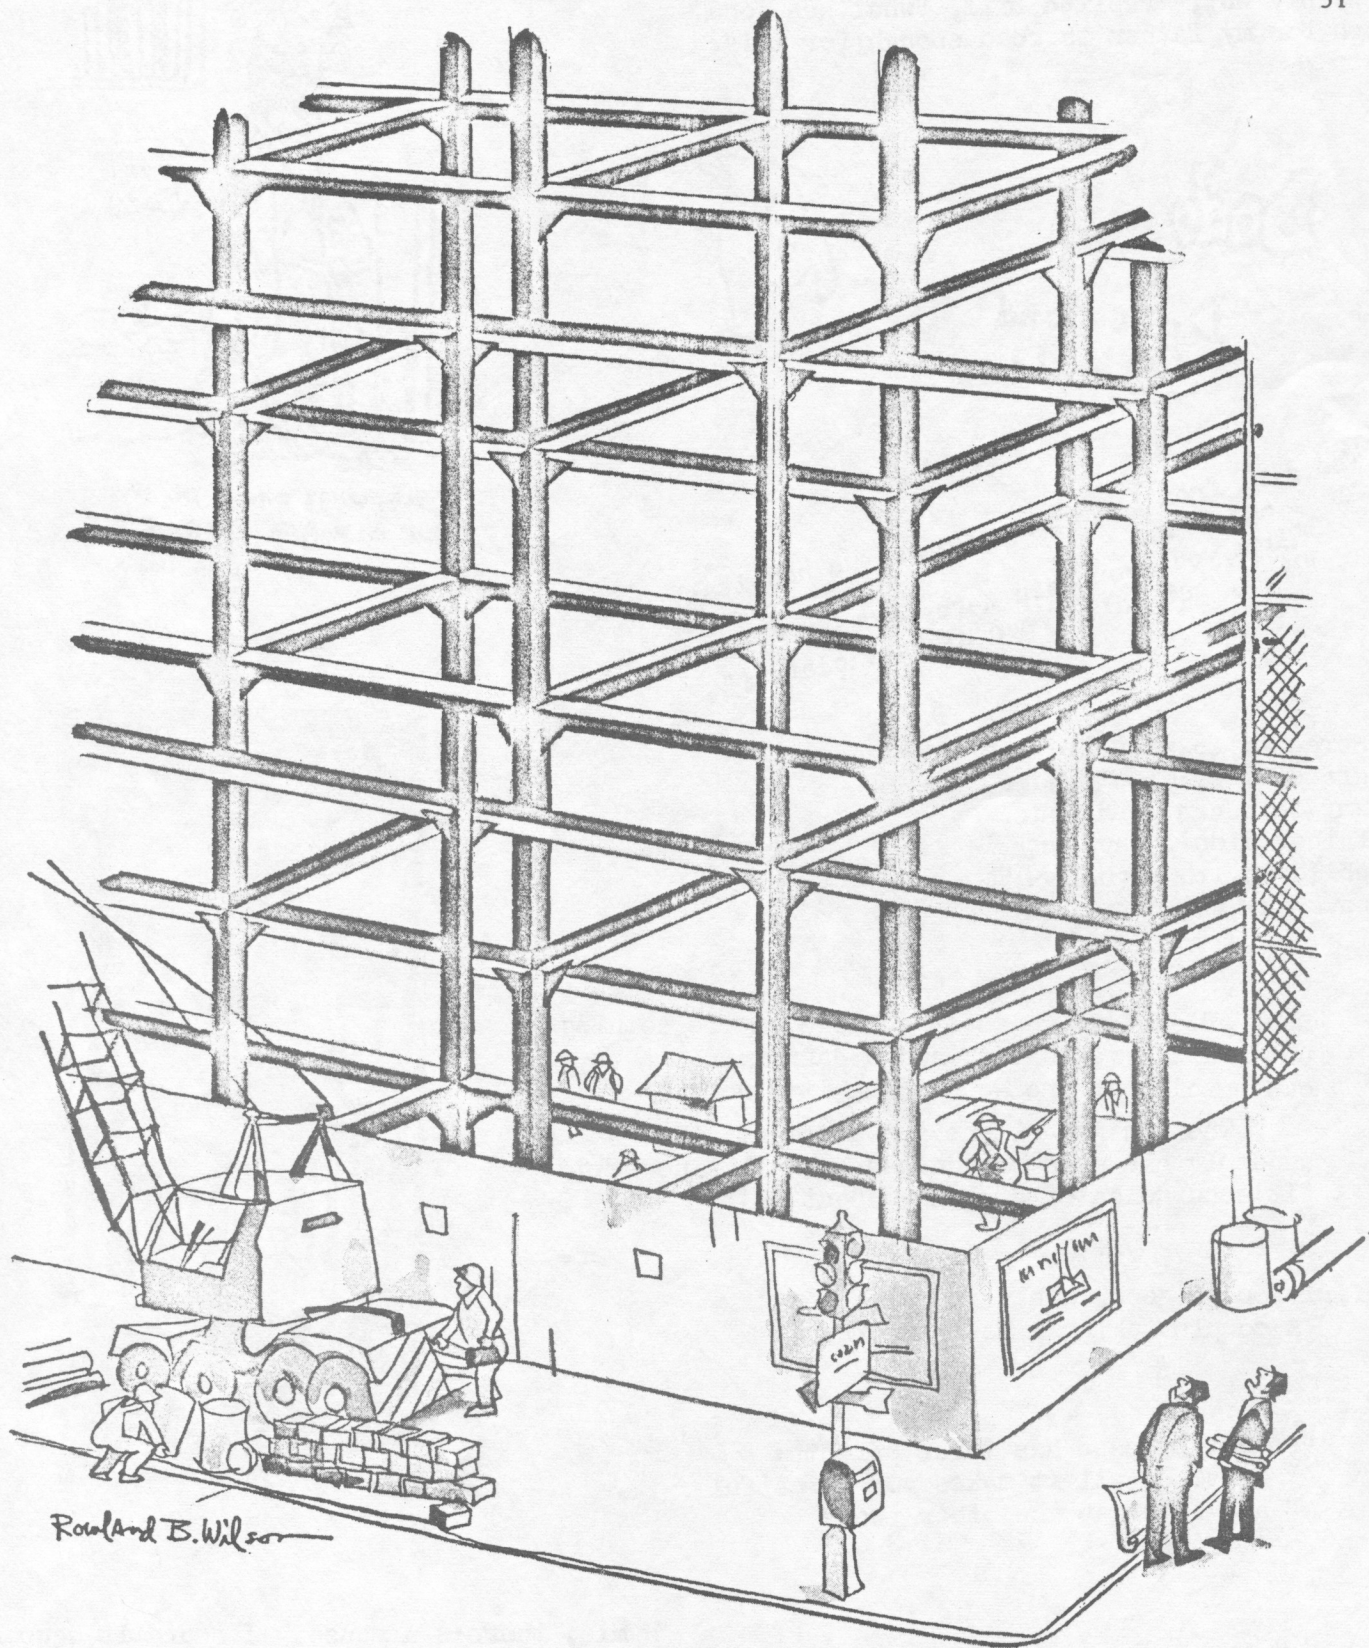

"WELL, WHAT CAN I DO FOR THE OLD AFA TODAY?"

-USNA TRIDENT-65

Hymie, there's a mouse. I heard it squeak!
So what do you want? I should get out of bed and oil it maybe?

"I think we'd better have another look at those plans."
