THE SCREWED COLOSSUS

Give me your soiled, your reek,
Your wadded linens yearning to be clean,
The wretched refuse of another week,
Send towels, and sheets untorn from restless dream;
I raise the soap that all your linens seek.

YOU WON'T BELIEVE HOW

DIRTY THESE SHEETS ARE...

HERE'S OUR LAUNDRY PICK-UP GIRL
COMING FOR YOUR SHEETS ID.

OH, Darn, we missed another deadline...

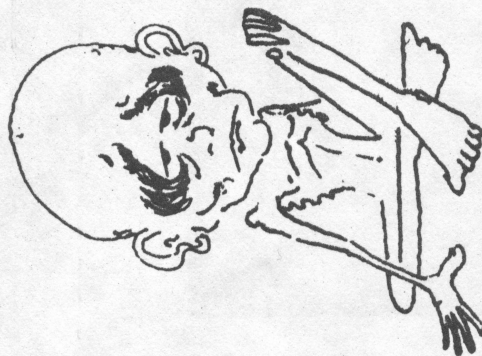

We are just sitting here serving our
connies all by our self. We are listening
to that thrilling new album— Mickey
Mantle's Greatest Hits.

By the way this is the laundry
issue in which we examine Academy
poverty programs in and around the
Hill. Rumor has it that one FBN
Laundry is suing for \$100,000,
because their program was terminated.

Lately, so much material in the
form of cartoons, pics and ideas has
been flowing in, all we ve had to do
is censor words like ~~and~~ and ~~see me asap!~~
Response to SMUT has been tremendous!
So good, in fact, we can't begin to give
ample coverage. Not that we're complain-
ing. We've already got more pages than
Taloon, Aspire and Daily Bulletin— Things
that are really important.

Well, the Ac Pro list is out. Don't
go check it, we've reprinted here in the
form of DoDo Staff. Don't worry if the
word from the Dean is "They shall not Pass"
Remember...
If at first you don't smoke up to speed,
Press on, Press on again!!!

CADET WING
LAUNDRY/ DRY CLEANING SCHEDULE

1 SEPTEMBER 1969

SQUADRON	SQUADRON TURN-IN	CONTRACTOR PICK-UP	CONTRACTOR RETURN (unwashed)
01-08,15,33	Monday	Monday	Thursday
10-14,16-25	Wednesday	Friday	A week from Monday
26-32,09,37	Friday	1st Tuesday of month	Make claim
34-36,38-40	-----No Laundry Service-----		

1. Laundry service is now being provided under contract by Snow White Laundry and Dry Cleaners (the former contractor is now under investigation by the Better Business Bureau). Cadets may make use of this service provided they comply with the following simple instructions:

LAUNDRY:

1. Cadets will send out one bundle of laundry (excluding linen and civilian ties) in an unmarked, brown paper bag per week. During a three week period following each leave, Ash Wednesday, and Arbor Day, there will be a limit of thirty-six(36) pieces. At all other times, thirty-seven(37) pieces will be accepted.
2. All items will be clearly marked with the cadet's serial number, social security number, and age, except for T-shirts, black socks, and baseball caps. These, wrap in newspaper and mail home.
3. Linen will be handled by a third class Linen Rep, who is responsible for collecting the linen monthly, and redistributing it at random, to insure even distribution of torn sheets. Civilian ties do not count as laundry pieces, and will not be returned to their owners.

DRY CLEANING:

1. Dry cleaning will be done according to the same schedule as laundry. Each cadet may send out no more than ten(10), nor less than five(5), pieces per week. All cadets will include pink copy of dry cleaning slip and retain yellow copy. Civilian trousers will be marked clearly on inside left cuff, civilian shirts will be marked along right sleeve.

CLAIMS:

1. All claims will be made to contractor representative. Present pink copy of laundry slip for loss or damage of hanger items, orange copy for bundle items, yellow copy for package items, and blue copy if nothing came back at all. Laundry slips not filled out in the presence of a notary public will not be accepted. Green copy of laundry slip is good for a free cheeseburger and coke at the nearest McDonald's.

NOTE: Any violation of the above procedures will make the violator subject to a Form 10 and confiscation of all his laundry.

ATTENTION IN THE AREA...
MR. NICK ZODIAK, A REPRESENTATIVE OF SNO-WHITE

PARENT'S WEAKEND Revisited...

R & D AT USAFA

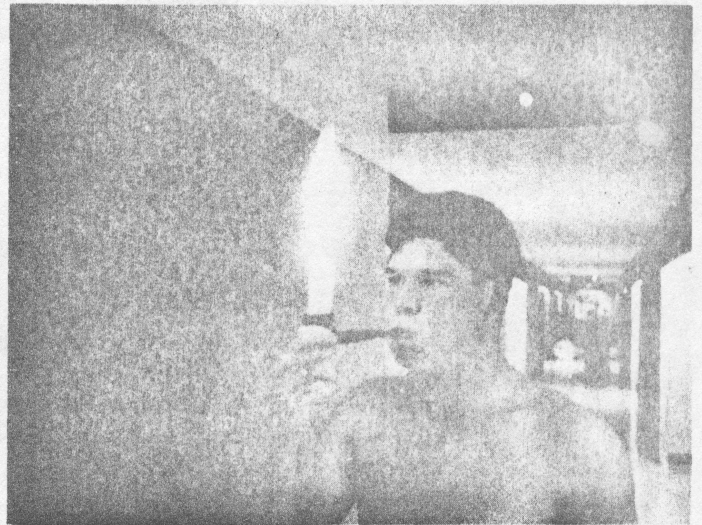

The DODO takes a look at the research being done at a top-secret area of the Academy. Here are some shots taken of the work being done on advanced propulsion systems. The text is an interview with Dr. Morris M. Applebomb, director of the research division.

D: Just what is going on here, Dr. Applebomb?

A: The basic steps of our work here include the testing of new fuels. This is necessary since we are developing a new type of propulsion system.

D: That looks dangerous.

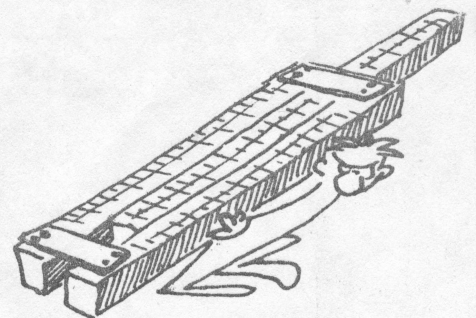

A: It's not, once the scalp is burned clean and the man has learned to stop inhaling.

D: What's the next step?

A: Testing the new fuel in a presently-used system. Here a new subsystem is also being tested, using propellant contained in a highly-pressurized can.

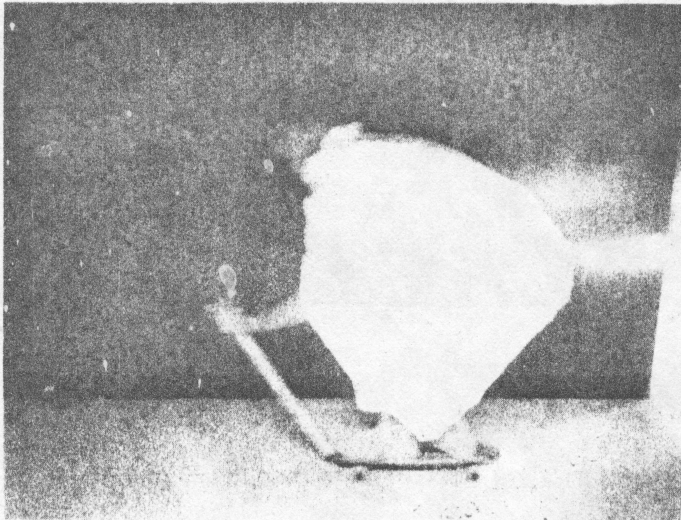

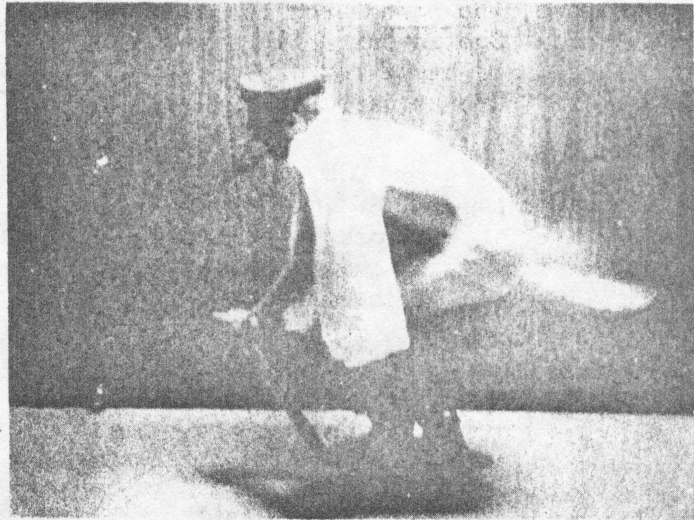

D: What does all this lead to?

Supper! Dinner!

A: The final step is mating the fuel and the new thruster to the rest of the new system. Colonel Otto Schmidlap is shown here testing a system under the code name of "Project Windbreaker."

A: Here is Colonel Schmidlap putting the system through a high-speed run. Note that the heat shield is now in place.

D: This system looks simple enough.

A: It is. The fuel is produced in crude form by Mitchell Hall.

D: Thank you, Dr. Applebomb. This has been most interesting.

Highest town on earth is Aucanquilcha, Chile, at 17,500 feet.

"What kind of roommate have you got?"
"Well, last night he hit his leg on a chair and cried about the "perversity of inanimate objects"!"

My Element Leader says I have to write home twice each month. This is once.

The Air Force Academy, "grinned the coach. (I didn't make this up either)"
 "What college was that?" excitedly asked the sports editor.
 "Chuck," he gritted indignantly, "What am I going to do about those college recruiters? Free tuition, room and board, \$110 a month spending money, a month's vacation with pay, and a guaranteed lifetime job after graduation!"

The local high school coach cornered the sports editor of the town paper.

Familiarity breeds attempt

Three fine old English gentlemen were commuting into London one afternoon and found themselves seated in the same coach. After several minutes of strained silence one of the gentlemen cleared his throat and introduced himself:

"Name is Whiting, Brigadier General, retired of course, married with two sons, both of them at Oxford." The second, not to be out done replied, "Name is ferguson, Brigadier General, retired of course, married with two sons, both in the ministry."

They then turned to the third gentleman who paused before answering, "Name is Newcastle, I only made Sergeant Major during the war and never married. But I do have two sons, both of them Brigadier Generals."
