Business: Harmon, Batch

O.I.C.: Capt. Sands

Censors: A cast of thousands.

Lucky
Ferre

Wee Wee Monsewer -
As I sit here
sifting the ruins
of our Archaic,

but Anarchic temple of love and happiness, I find what I see rather disconcerting. Progress marches backwards as we say Bon voyage to our beloved Capt. Adams and say hello to - (tada!) Capt. Sands our new Occifer-In-Charge. Yesterday, as I placed the Flowers on the grave of my Friend Charley, I couldn't get rid of the feeling that there was a poison-dart of censorship with my name on it. Did you hear the rumor that Colonel Hart is in the Rampart Range training mad and bald AOC assassins for that day when they will swoop down like an old "Yul Brynner and the Mongol Horde" movie to engage in all types of lustful conquests. Went and saw my HONOR REP yesterday. Asked him what's going on. "Not much" he replied. Feels great to know our boys are on the ball. Have to leave now. Don't forget to use George's Butch Wax for those wind-tunnel inspections. Remember: "The only good shoe is a brown shoe"

YES! ONE LAST* TIME, ITS...

SNAPPY

ANSWERS
TO STUPID

QUESTIONS

* YES, I HAVE FINALLY
RUN OUT OF IDEAS!
SEND YOUR OWN TO ANY
STAFF MEMBER, OR CS-01
C/O THE DODO EDITOR!

HOW ABOUT A DATE?

O.K., FEBRUARY 29TH.

TERRIFIC, WHO IS HE AND WHAT DOES HE LOOK LIKE.

NO THANKS, I'M ON A DIET.

HOW ABOUT A PEAR?

CUT YOURSELF, HUH?

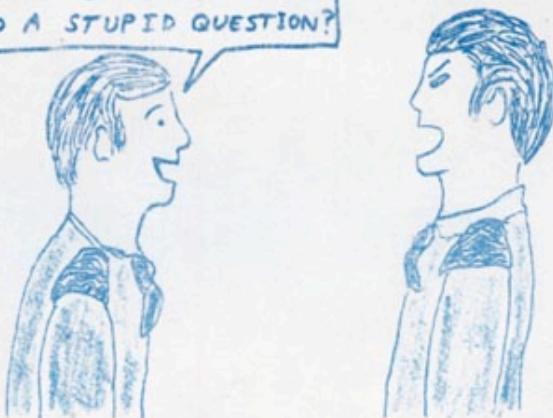

NO, I'M JUST REMOVING SOME INGROWN EPIDERMIS.

NO. I JUST POPPED A HUGE SQUARE PIMPLE!

NO, THE RAZOR CAME WITH A THREE INCH FLAP OF SKIN HANGING OUT OF IT!

NO. THE DAMN SKIN JUST DROPPED OFF BY ITSELF!

IS THIS THE LAST SNAPPY ANSWER TO A STUPID QUESTION?

NO. THAT WAS THE LAST STUPID QUESTION. THIS IS THE LAST SNAPPY ANSWER.

NOT IF YOU STARTED READING THIS PAGE FROM THE BOTTOM, PREFACE.

YA GOT ME, I'M INCAPABLE OF TURNING THIS PAGE TOO!

ONLY WHEN I LAUGH!

A SPECIAL ...

BRING-YOU-OUT-OF-THAT DARK-AGES-SLUMP PAGE...

THE AMAZING HYDROGEN BALLOON TRICK!
 STEP 1.) PROCURE SOME BALLOONS, A CAN OF DRAINO, FLOOR WAX, TINFOIL, AND A COKE BOTTLE.
 STEP 2.) PUT TWO INCHES OF WATER AND 3 SPOONS OF DRAINO INTO THE COKE BOTTLE, MIX WELL.
 STEP 3.) TEAR OFF ABOUT ONE SQUARE FOOT OF TINFOIL (ACTUALLY IT SHOULD BE ALUMINUM FOIL) AND RIP IT INTO STRIPS. ROLL THESE STRIPS INTO PENCIL THIN STICKS, ABOUT TWO INCHES LONG, AND DROP THEM INTO THE SOLUTION. THEN QUICKLY PUT A BALLOON ON THE MOUTH OF THE BOTTLE.
 STEP 4.) WHEN THE BALLOON IS FULL, TIE IT OFF. IT SHOULD FLOAT!!!!!!!

THE AMAZING BUFFER RIDE!
 OBTAIN A GOOD BUFFER. IT CAN BE MOUNTED MUCH THE SAME AS A HARLEY. HAVE A FREIND HOLD THE CORD OVER YOUR HEAD. YOU ARE NOW READY TO "EASY-BUFF". BE SURE YOUR WEIGHT IS CENTERED AND SLOWLY DEPRESS THE GRIPS. FUN, ISN'T IT? THE CURRENT RECORD IS SOMEWHERE AROUND 14 REVOLUTIONS. CAN YOU TOP THIS? IF YOU DO, LET US KNOW... YOU MAY BE ELIGIBLE FOR A DODO ACADEMY AWARD, WOW!

JOKES JOKES JOKES
 (GOOD ANALOGY TO A ELEPHANT JOKE.)

Q. HOW CAN YOU TELL IF THERE IS A CADET ON YOUR BACK DURING A HURRICANE

A. YOU WILL BE ABLE TO HEAR HIS HAIR FLAPPING IN THE WIND. HAHAHHA

Q. WHAT GOES: RED WHITE RED WHITE PINK PINK PINK PINK
 A. BABY IN A BLENDER

BELIEVE IT OR ELSE!!!
 THE AVERAGE CADET HAS 200,000 HAIRS ON HIS HEAD, EACH OF WHICH IS 4 INCHES LONG.

THIS MEANS, THEN, THAT THE AVERAGE CADET HAS ABOUT 11 MILES OF HAIR. SHOCKING!

BELIEVE IT OR ELSE! (AGAIN)!
 MITCHELL HALL COFFEE IS OVER ONE YEAR OLD! TO PROVE THIS RECIRCULATION THEORY, AN ANONYMOUS CADET PUT HIS HANDKERCHIEF INTO A COFFEE POT AT MITCH'S LAST YEAR...

TODAY, ONE YEAR LATER, HE GOT THAT SAME HANDKERCHIEF BACK IN A DIFFERENT POT. ON IT WAS 148 WAITERS' SIGNATURES!!!!!!

BELIEVE IT OR ELSE!!!
 AMAZING ENDURANCE FEAT! CADET X, DID IN FACT, STAY AWAKE FOR ONE ENTIRE PERIOD OF POLI-SCI! HE WOULD HAVE HAD THE RECORD TOO, BUT HIS FOLLOWING CLASS WAS ECON. HE PERFORMED THIS AMAZING FEAT BY HOLDING A MOUTH FULL OF WATER, UNTIL, IN ECON, 40 MINUTES INTO THE PERIOD, HE DOZED OFF AND DROWNED.

WRITE A POEM HERE, HELP US
FILL THIS PAGE UP.

FORENSIC "ON SEASON"

JOKE

AS THE WAR BETWEEN THE COM-SHOP AND THE CADETS REACHED ITS PEAK, THE COM-SHOP BEGAN TO THROW STICKS OF DYNAMITE AT THE CADETS. THE CADETS, REACTING QUICKLY, PICKED UP THE STICKS OF DYNAMITE, LIT THEM, AND THREW THEM BACK!

After you've finished C.O., relax with O.C.

HOW TO MAKE ETHYL PALPITATE

Previous attempts to make Ethyl Palpitate have resulted in a rather sporadic success. A good yield, once obtained, could not be duplicated on successive evenings and so on. Accordingly it was decided to more closely investigate the optimum conditions for favorable reactions.

One of the most important factors was found to be the purity of the Ethyl chosen for the work. Some of the authorities claimed that very impure Ethyl alone could be counted on for success, while others said that a hitherto unreacted Ethyl was best. Our extensive investigations have shown that both of these extremes should be avoided.

Reaction of the highly impure Ethyl often occurs with considerable violence--explosive at times--with great danger of damage to equipment and operators. On the other hand, overly pure Ethyl shows a natural un-reactive tendency, forming products such as Ethyl Hesitate, which is a tendency that cannot be overcome by even the most skillful operator. The recommendation is therefore made that samples of average purity be chosen for the best yield. A good criterion of reactivity is whether the compound Ethyl Osculate can be made easily.

Regarding solvents and catalysts, alcoholic solutions are generally most satisfactory, although they add somewhat to the cost of the preparation. The alcohol concentration should be very carefully controlled as the saturated form of Ethyl is useless. As a general rule, light should be avoided as it has an inhibitory effect in most cases.

One word regarding conditions of reactions---it is highly important that no other member of the Ethyl family be present.

Chemically, the proper course of reaction is as follows: As gentle warming is applied (which can be accomplished in several ways---an open fire has much to recommend it) the formation of the following products is successfully observed: Ethyl Reciprocate, Ethyl Agitate and, in some cases, Ethyl Vibrate, and, finally, (if the heating has been carried out at exactly the correct rate), the desired product--Ethyl Palpitate.

Under no circumstances should the heating be attempted too rapidly, as undesirable side reactions can set in, the mildest of which leads to Ethyl Remonstrate, more usually the sudden appearance of Ethyl Refrigerate, and, in certain extreme cases, to Ethyl Assasinate.

As a final point of observation, I would like to point out that with certain difficult reactions, the catalytic influences of gold, silver, or precious stones will insure good results.
