Falcon Stadium

ONE DOLLAR

What you need to know about import-size cars depends on what you expect from one.

If you're looking for precise handling and resistance to cross winds, you'll need to know that Ford's new little Pinto has a wider stance than any economy import and is the only car in its class with rack-and-pinion steering (like in Porsche and Jaguar).

If you're looking for performance for freeway driving, you'll need to know that Pinto's 1.6 litre engine has 75 horsepower compared to VW's 60. Or you can get Pinto's 2 litre engine with overhead cam and Webber carburetion that develops 100 horsepower—which is more than either Toyota Corona or Datsun.

If you want real economy, you'll need to know that Pinto averaged over 25 mpg in simulated city and suburban driving, that the steering is lubed for life, that it

needs oil changes only twice a year. And that its suspension needs lubrication only once in three years (or 36,000 miles).

If you're interested in durability, you'll be happy to know that Pinto has parts you'd expect to find in bigger, stronger cars. So it will run quieter, longer.

If you want heavy-duty brakes, you should know that you can get floating-caliper front disc brakes on Pinto.

If you want driving ease, you need to know that Pinto offers you SelectShift—the three-speed automatic transmission that lets you downshift or hold lower gears for better control.

If you're looking for room inside where inches really count, you'll need to

know that Pinto has more front leg room, more front and rear shoulder room, and more rear-seat knee room than VW, Toyota Corona, or Datsun 510 and Pinto's door is wider than any of the smaller imports for easy rear-seat entry-exit.

Pinto is import priced and sized, but gives you more...more room inside, greater driving ease, better handling, and the durability you want in a small car.

So if you expect more, then Pinto may be all you need to know about import-size cars.

A little better idea from Ford.

The 1971 Air Force Magazine

Today's Program Cover

Today's program cover was painted by Jim Spanfeller. Born and educated in Philadelphia, he graduated from the Philadelphia College of Art and attended the Pennsylvania Academy of Fine Arts after two years in the Army from 1952-54.

Spanfeller's work has appeared in *Playboy*, *Ladies Home Journal*, *Redbook*, *Seventeen*, *Avant Garde*, *Argosy* and *Intellectual Digest*.

In 1964 he received the artist of the year award from the Artists Guild of New York. A year later he was honored with the New York Herald-Tribune Children's Book Award.

He has illustrated approximately 30 children's books including one with television personality Henry Morgan. Last year one of his efforts was nominated for a National Book Award.

Spanfeller now lives in Katonah, N.Y., with his wife and 15-year-old son.

CADET SQUADRONS HAVE

When you hear the name Ali Baba, what does it call to mind?

The 40 thieves! Right? From tales of the "Arabian Nights"...

Each of the 40 squadrons within the Cadet Wing has a distinctive unit emblem. The official patch of the 40th Cadet Squadron was designed around the Ali Baba theme.

In the fall of 1969, as the authorized strength of the Cadet Wing began to grow toward 4,417, the number of cadet squadrons was increased from 32 to 40.

"Since the 40th was one of eight new units activated at the Academy, we needed a name and a design that was unique, something we could identify with," said Cadet Lieutenant Colonel John Buchanan, unit commander. "After discarding such ideas as the P-40 Warhawk, and aircraft maneuvering in flight to form the number 40, we adopted the Ali Baba theme. The patch was actually designed by Cadet First Class (senior) Rich Borenstein who followed it through to adoption."

The 40th Squadron patch is a circular red background bordered in gold. Superimposed on the red are two crossed scimitars and a dark blue pointed dome that might top a minaret. On the dome are gold stylized Roman numerals for forty -XL. Pronounced in sequence, the letters denote a characteristic of the squadron: "ex-cel." The silver-bladed scimitars denote the courage and valor of warriors of old. On an arc across the bottom of the circle are the words ALI BABA in blue letters on a silver background. The blue, silver, red and yellow represent the colors of the four classes of the Cadet Wing.

The Air Force encourages the use of emblems as a means of fostering unit pride and morale. The emblem is usually a symbolic design portraying the distinctive history or general function of a unit.

Accordingly, when the Air Force Academy first began operations in temporary quarters at Lowry Air Force Base in the summer of 1955, the then existing cadet squadrons were authorized to submit distinctive designs for approval.

CADET RICH BORENSTEIN
Designed the 40th Squadron ALI BABA emblem

Most of the original squadron patches are still in use today.

The design, approval, and use of squadron patches is spelled out in Air Force Regulation 900-3 and in Air Force Cadet Regulation 35-11. There are several requirements which squadron emblems must meet.

For example, the design must fit within the boundaries of a five and one-half inch circle although the final shape is often not circular. The design must be distinctive, symbolic, dignified and in good taste. Drawings submitted should not bear symbols of a morbid nature or games of chance, nor should they contain more

DISTINCTIVE EMBLEMS

By
Bill Madsen

than six colors. Prominent in the emblem should be the Air Force colors deep ultramarine blue and golden yellow; many squadron patches feature the official blue and silver Academy colors.

"Cadets wear squadron emblems on athletic jackets," said Cadet First Class David Stubbs, commander of the 26th Squadron. "Seldom seen by the general public, athletic jackets are worn during cool weather in the Cadet Area only to classes, formations or meals. The emblem is centered above the left pocket. Other insignia are worn on the jacket, too. The number '73,' worn on the left shoulder, indicates the cadet will graduate in June 1973. Summer activity patches, as for soaring, parachuting or Recondo training, can be worn on the right shoulder. And athletic letters can be worn on the right side of the jacket below the pocket."

Cadets of the 26th Squadron — the Red Barons — wear a circular patch featuring Snoopy. The famous comic strip hero, who flies his doghouse in aerial combat with the legendary Red Baron of World War I, sits atop his abode clad in helmet, goggles and flowing scarf. Renowned for returning to the fray undaunted, Snoopy's indomitable spirit typifies the 26th Squadron.

Shaped like a spearhead bordered in black, the 1st Squadron emblem bears a Maltese Cross and golden Griffin on fields of green and black. The squadron motto, "First Takes Care of Its Own," is on a streamer across the bottom. The emblem honors the historically famous First Fighter Wing.

Other squadrons have mottos, too. With the challenge, "Catch Us If You Can," cadets of the 32nd Roadrunners squadron have a patch that dates back to the great tradition of Rickenbacker's "Hat in the Ring." The cocky little Roadrunner symbolizes pride in squadron and self, while the jet indicates the desire to join other pilots in Air Force aircrew service.

The modern nucleus of an atom in yellow on a blue field is the theme of the 39th Squadron. The motto, "Potentia Vincere" — The Power to Conquer — is in a blue field beneath the central

design. The colors red, yellow, blue and silver are symbolic of all four classes.

"A charging razorback depicts the aggressive fighting spirit of the men of the 34th Cadet Squadron," said Cadet Lieutenant Colonel Stephen A. Chiabotti, commander. "Below the boar, blue pathways lead to varied career fields which our graduate 'Tuskers' will pursue in the Air Force. Three stylized aircraft symbolize the desire of cadets to fly and maintain freedom of the skies."

In a design unique in its forceful simplicity, the 33rd Squadron emblem features two stylized falcons diving in formation trailing arched blue contrails. The black numerals "33" are prominent in the white background edged with a narrow yellow border. The Air Force colors, ultramarine blue and golden yellow, are used on the speeding falcons.

A dominant black figure "8" on a horizontal white diamond edged in black identifies cadets of the 8th Squadron. Laced through the eight are two silver lightning bolts. Behind the eight a red, gold, royal blue and silver rainbow sweeps across to a silver star on the left. The colors represent the four cadet classes. The rainbow leads to the star, the ultimate career goal of cadets. The dynamic spirit and aggressiveness of the squadron is typified by the lightning.

In a recently approved and adopted design, the word "Thirty-One" appears in an arc across the top of the circle which carries an astronaut in a white suit against a black sky. Three gold stars and one silver star float in the void. For Cadets of the 31st Squadron, the astronaut exemplifies the spirit and courage of every man in the aerospace field, of all members of the Cadet Wing, and in particular those of their own unit.

In the space available it is impossible to describe each squadron emblem. In every case, however, the unit patch was designed by the cadets in a theme meaningful to every member of the squadron. Cadets wear the colorful cloth patches with pride in the Air Force Academy, the heritage of the U.S. Air Force, and in our nation itself.

The Home Office.

We know how it is. Work comes from school, work comes from work, and then there's the household to manage besides.

Two Smith-Corona® machines can help.

The Coronet™ Automatic Electric Portable Typewriter is one. It has a push-button carriage return. And the power, precision and speed to let you breeze through the heaviest typing loads.

The Figurematic® Electric Adding Machine is another. It weighs only 8 pounds and gives you instant accuracy whenever you use it. Adds, subtracts, multiplies. You'll use it for balanc-

ing your checkbook, paying bills, doing homework, and working on your income tax.

Fine machines. Think of them as home appliances. Because that's just what we did when we designed and built them.

Today's Game | Air Force Academy vs. University of Missouri

By HAL BATEMAN

Air Force Sports Information Director

This afternoon's renewal of the series between Air Force and Missouri is not a very long one in terms of games but it certainly has turned out to be one of the most exciting in the nation.

There have been only five games played in the series with the Tigers holding a 4-1 advantage but the scores have generally been close and the games always exciting.

It all started in 1959 when Missouri defeated the Falcons, 13-0, at Columbia. The next year the Tigers again prevailed, 34-8, in a game at the old University of Denver Stadium. In the Tigers last appearance at Falcon Stadium, they won, 17-7, in 1964, then stretched their winning streak to four in a row with a 19-17 come-from-behind triumph in the final seconds at Columbia two years ago.

Those four games were frustrating ones for the Falcons but Air Force gained its revenge at Busch Stadium in St. Louis last season, scoring a 37-14 victory after leading by an almost unbelievable 30-0 at the half. It was a great triumph for the Falcons, who vaulted into the national rankings and ultimately went on to play in the Sugar Bowl.

Missouri also remembers that game and would like to enact its own type of revenge before the Falcons' home fans today. The Tigers have a new coach this season in Al Onofrio, no stranger to Missouri football since he was one of their defensive coaches for 13 seasons. The Tigers got off to a rough start last Saturday, bowing to Stanford, 19-0, but they have the advantage of already playing a game while the Falcons will be leaving the gate for the first time.

The principal architects of that 37-14 victory a season ago are gone so the Falcons will have some new faces on offense today, particularly in the passing phase of the game.

Gone are quarterback Bob Parker and All-America flanker Ernie Jennings, who did so much to bedevil the Tigers last season. Both are now in graduate school so coach Ben Martin will have some new faces in the offensive backfield today at quarterback and flanker, junior Joel Carlson and sophomore Greg Smith.

Carlson, the second-string quarterback last season, is a strong runner who is rapidly developing as a passer. Smith has sure hands and the ability to make the key catch.

Running is expected to play a big part in the Falcon offense this season and the leaders of the ground game are once again expected to be senior tailback Brian Bream and senior fullback Kevin Brennan, the top two rushers last season who need little introduction to Falcon football fans. Bream was great in 1970, winding up as the nation's top scorer and fifth in the rushing department. He looks better than ever this fall. Brennan, regarded as one of the finest blocking backs in the nation, is expected to carry the ball more this fall and is quicker after losing 10 pounds from his 1970 playing weight.

Four players on the Falcon varsity will have more than the usual interest in today's game. They all hail from the St. Louis area — junior offensive guard Glyn Ottofy from St. Louis, sophomore quarterback Rich Haynie of Florissant, sophomore quarterback Jim Schoeck of Webster Groves and sophomore offensive tackle Art Ratkewicz, who is from Madison, Ill., right across the Mississippi River from St. Louis.

The Tigers next two opponents will be familiar foes to the Falcons. The Tigers meet Southern Methodist at home next Saturday, then travel to Army, two teams Air Force will meet later in the season.

In a skid, the thing that can kill you is your own instinct.

A little sand spilled on a nice dry highway. A spatter of rain on an oily city street. A patch of glare ice on a bridge.

You can skid on all of them. Even with brand new tires. Even at 12 miles an hour. And, if you skid, you can count on your instinctive reflexes to try and murder you.

Because your instinct wants the skid to stop. So it tries to make you hit your brakes (figuring that brakes can put a stop to **anything**).

Your instinct figures wrong.

Hitting your brakes keeps your wheels from rolling. So they're forced to keep sliding. And a minor skid can turn into a fatal crash.

When you start to skid, forget your instinct and re-

member these rules:

Keep your foot **off the brake**.

If your rear wheels are sliding to the right, steer gently to the right until you feel the tires gripping the road again. (Don't make any fast, sharp moves.)

If your rear wheels slide to the left, steer gently to the left.

If you **must** stop, pump your brake pedal with a hard, rapid, on-and-off action to keep your wheels from locking and skidding even worse.

Finally, if you **must** drive on a slippery road and your instinct tells you that a sudden change of speed or direction could make you skid, obey it. (Your instinct isn't **always** wrong.)

Mobil
We want you to live.

THIS IS THE ACADEMY

Location: Approximately 10 miles north of Colorado Springs, Colorado, at the base of the Rampart Range of the Rocky Mountains. The Academy site covers 18,000 acres.

Enrollment: 4,100 (approximate). Public Law 88-276 was signed by the President on 3 March 1964 authorizing an increase in strength of the Cadet Wing from 2,529 to 4,417.

Founded: Authorized 1 April 1954. The first class was received 11 July 1955. The first class was graduated in June 1959.

Colors: Silver and Blue

Nickname: Falcons

Mascot: Falcon (Mach I)

Curriculum: The U.S. Air Force Academy is neither an engineering nor a liberal arts college, but combines certain elements of both. It may be accurately described as a school of general education for professional Air Force Officers—a school which endeavors to give each cadet the knowledge and qualities of leadership required of an officer in the United States Air Force and a basis for continued development throughout a lifetime of service to his country, leading to readiness for responsibilities as a future air commander. A cadet who completes the 4-year course will graduate with a Bachelor of Science degree and a commission as a second lieutenant in the Regular Air Force.

UNITED STATES AIR FORCE ACADEMY MISSION

To provide instruction and experience to each cadet so that he graduates with the knowledge and characteristics essential to leadership and the motivation to become a career officer in the United States Air Force.

LT. GEN. ALBERT P. CLARK
Superintendent

BRIG. GEN. WALTER T. GALLIGAN
Commandant of Cadets

KNEELING: (Left to Right) Leland Kendall, defensive line coach; Nick Lontas, receivers coach; Ben Martin, head coach; Bernard (Bernie) Raetz, offensive backfield coach; and Carlton (Skinner) Simpson, head junior varsity coach.

STANDING: (Left to Right) Lawrence (Butch) Metcalf, offensive line coach; Jack Braley, defensive backfield coach; John Carney, linebackers coach; Jim Bowman, head freshman coach; and Eldon (Spike) Hillstrom, offensive line coach.

FALCON SPOTLIGHT BRIAN BREAM

**5-9, 191-pound senior tailback
from San Leandro, Calif.**

If there is any musclework to be done in the Air Force Academy running attack, chances are the ball will go to "The Muscle" Brian Bream, a Falcon co-captain this fall.

A senior tailback from San Leandro, Calif., Bream was nicknamed "The Muscle" because of the 191 pounds he packs on a five-foot, nine-inch frame.

A reserve in 1969, Bream missed the first game last season because of a knee injury but since then he has turned into one of the top ball carriers in the nation and a major reason why the Falcons posted a 9-3 record during the 1970 season.

Although missing one game, Bream still accounted for eight records during the season, including most carries (294), most yards rushing (1,276), most touchdowns (20), and most points (120). He also caught 19 passes for 237 yards.

"He's got exceptional balance and he delivers a blow on a tackle instead of receiving one," said Falcon head coach Ben Martin. "He can really make the tough yardage."

Bream is easily the best running back in Falcon football history and with another season remaining will be an excellent All-America candidate in 1971.

He was impressive in spring drills and continued in top form in preseason practice last fall but suffered a knee injury in the final preseason scrimmage and missed the opening game against Idaho.

He returned to the lineup against Wyoming a week later and powered the Falcons to a 41-17 victory with 160 yards on 22 carries, scoring twice, one on a 55-yard pass from quarterback Bob Parker.

He gained 207 yards on 36 carries against Navy and set a school record with 42 carries against Stanford. He gained at least 100 yards rushing in nine of the 11 games in which he played last season.

MEET THE FALCONS

KEVIN BRENNAN, 6-1, 211-pound senior fullback from Chicago. Starting fullback last season who logged more playing time than anyone else on offense with 318 minutes. Second leading ball carrier a season ago with 224 yards in 58 carries, including a best of 82 yards on 17 carries against Navy. Carries a B average in an engineering management major.

GARY BLANK, 5-11, 209-pound senior defensive tackle from Morrisville, Pa. Two-year letterman who has logged 104 minutes in each of the last two seasons. Has started in several games. Made or assisted on 34 tackles in 1970, including four for 14 yards in losses. Very quick with good pursuit. Majors in history.

KENT BAYS, 6-0, 171-pound senior defensive back from Tulsa, Okla. Two-year letterman and starter who missed spring drills because of knee surgery. Played 190 minutes as a sophomore and 188 last fall. Figured in 58 tackles and eight pass breakups in 1970. Also intercepted two passes. Majors in life science.

JOHN GRIFFITH, 6-3, 233-pound senior defensive tackle from Oklahoma City, Okla. A two-year letterman who combines strength with speed. A reserve last season, he saw 31 minutes of action, figuring in 12 tackles. One of the smartest players on the team with a 3.69 cumulative average in chemistry.

DARRYL HAAS, 5-11, 198-pound senior linebacker from Corpus Christi, Tex. A two-year letterman who was a starter last fall, playing 309 minutes and making 107 tackles, including 11 for 48 yards in losses. Also had four pass interceptions, knocked down five passes and recovered four fumbles, including one in the Sugar Bowl for a touchdown. He carries a 3.41 cumulative average in engineering mechanics.

1971 Air Force Falcons

Bottom Row (L-R): Charlie Richardson, Kent Bays, Darryl Haas, Craig Barry, Brian Bream (co-captain), John Greenlaw (co-captain), John Griffith, Paul Bassa, Gary Blank.

Second Row (L-R): Jim Janulis, J. C. Weydert, Kevin Brennan, Willie Mayfield, Pat Stucker, Gordon Herrick, Jim Stanton, Don Sexton, Larry Huff.

Third Row (L-R): Steve Waller, Paul DeHart, Charles Fitzpatrick, Steve Koch, Joel Carlson, Chip Hough, Dave Gessert, Duke Mitchell, Mark Prill.

Fourth Row (L-R): Dan Novak, Jim Beaman, Jim Morris, Dave Stonehouse, Bill Berry, Frank Murphy, Lance Webb, John Townsend.

SPLIT SCREEN: During instant replay of an exciting pass play, ABC employs split-screen technique to allow viewers to watch action of both the passer and receiver. Such replays are often shown in slow motion so arm-chair spectators can analyze each element of the play. Top panel shows passer and receiver on the same screen; bottom panel shows receiver catching the pass.

SIDELINE ACTION: This portable color television camera is used on the sideline during television coverage of an Air Force football game, providing viewers with "sideline action," including interviews and closeups of players and coaches and views of the spectators. Action captured by side-line and other cameras may be broadcast directly to viewers, recorded on videotape for later replay, or on HS-100 recorders for possible "instant replay" use.

TELEVISION'S 'INSTANT REPLAY'

The most delightful innovation of televised sports is, without question, "instant replay" — that right now second look at what just happened.

From Fall's first kickoff to the final gun at the Super Bowl, "instant replay" is again increasing the viewing enjoyment of the nation's armchair quarterbacks. It provides television fans with a bonus not even available to holders of 50-yard line tickets — an immediate closeup of significant action, in color and often in slow and stop motion.

Now entering its fifth football season, "instant replay" is probably the most appreciated and least understood feature of televised sports coverage.

Special "instant replay" recorders were developed by Ampex Corporation in 1967 for immediate playback of sports action — in color and in slow motion, fast motion or reverse motion. These recorders use highly polished disks for recording surfaces instead of reels of tape used on conventional videotape recorders. The disks permit variable speed playback, plus stop motion, not easily possible with tape recorders. And access to recorded pictures can be accomplished much more

quickly and accurately, as there is no rewind process as with tape.

Here, from Ampex Corporation, inventor of video recording and supplier of nearly 100 color "instant replay" machines to television stations and networks, is a brief description of the effort and equipment that go into bringing "instant replay" to the home screen.

In an important game, two or three cameras are assigned to feed action pictures to "instant replay" machines. The "iso" camera, located in the end zone, generally focuses on the wide receiver or split-end and follows his maneuvering against the defensive back. This often provides the most exciting "instant replay" action as the wide receiver is a frequent target for the quarterback's passes.

A second camera assigned to the offensive team, and a third to the defensive team, are also favorites for "instant replay" recording. In this way, fans are treated to a slow motion replay of key blocks by the interior linemen to spring a running back, or they watch again as the linebacker pours through to sack the quarterback.

In addition to these cameras, as many as five other cameras are beaming live pictures into a bank of small

television monitors in one of the television vans located outside the stadium. Recorders, transmission equipment and key television people are located in the vans. All decisions as to what is broadcast are made in the vans by people who never see a live play during the game.

From this wealth of material, the director of the telecast determines what goes on the air. He is able to communicate by intercom with all of the cameramen, the operators of the "instant replay" recorders, and the technical director manning the control board who presses the buttons that select the camera output to be shown on the air . . . and also what camera feeds "iso" recorders.

A special bank of television sets shows the director what is available for "instant replay." He may select the "iso" camera to repeat a sideline pattern by the flanker that resulted in a long gain. Or he may wish to show the tremendous pressure being put on the quarterback by the defensive line.

A word to the "instant replay" operator and the technical director and the action is placed on the air — in slow motion if requested.

In addition to the "instant replay" recorders, a conventional videotape recorder may be used to record every play of the game as it is broadcast. Routine plays are erased immediately, and the most exciting plays are retained for a "highlights" tape.

Even with all these camera choices and the seasoned guesswork of the director and his crew, occasionally a key play or a favorable angle is missed. The game continues to have its surprises. Because of this announcers are cautioned not to tell the audience that an "instant replay" will be forthcoming until they are certain that the play has been recorded.

"Instant replay" began as a keep-your-fingers-crossed gimmick in the early 1960s using conventional videotape recorders. Today it is a precise, easily controlled electronic recording function using Ampex magnetic disk recorders specifically designed for this purpose. First used by ABC Sports during the U.S. Skiing championship in March 1967, the "instant replay" machine is widely used today on most major network sportscasts, including such top features as the World Series, college and professional football and the Olympic Games.

For the more technically inclined, the HS-100 records up to 30 seconds of action on highly polished and plated metal disks. The operator can cue up any portion of the 30 second recording in just four seconds for immediate playback on the air. The recorded action can be played as many times as necessary, and can be played in variable slow motion down to stop action in both forward and reverse.

SUPERIMPOSED SCORE: While ABC engineer prepares to show an "instant replay" of a segment of exciting football action during a recent college game, the network superimposes the score of another game over the picture of the playing field. Modern television equipment, such as the "instant replay" recorder and TV switchers which permit special video effects, enable television stations and networks to keep the viewers' interest even during a lull in the game being covered.

UNIVERSITY OF MISSOURI

Home of The Tigers

Journalism activities at the University of Missouri-Columbia currently are directed by Dean Roy M. Fisher, the fifth dean to head the School of Journalism in its history dating back to 1908.

Most of the activities are contained in the two buildings, Tate Hall, left, and Walter Williams Hall, right, which are connected by a tower proclaiming in Walter Williams words that newspapers are the "schoolmaster of the people." A third building to the rear, not shown, houses the Columbia Missourian, daily and Sunday commercial newspaper published by students of the school under faculty supervision.

Of the 16 divisions that is attracting some 22,000 students to the University of Missouri-Columbia perhaps the best known is the School of Journalism, founded in 1908 as the first school of journalism in the world.

With its thousands of graduates scattered throughout the nation and the world, the School of Journalism has one of the best built-in public relations staff that can be assembled. It has "infiltrated" not only the newspapers of the world, but also radio, television, advertising, technical, trade and magazine empires.

Initial journalism instruction at Missouri dates back to 1879, but it was in 1908 that the courses were incorporated into a full-fledged school headed by the late Walter Williams, who among other achievements was founder of the Press Congress of the World and who remained as dean until his death. The school has maintained high standards in subsequent administrators, including the late Frank L. Martin, Dean Williams' hand-picked associate and successor; the late Frank Luther Mott, Pulitzer prize winner; Earl F. English, who was instrumental in establishing accreditation procedures for the nation's journalism schools; and currently by Roy M. Fisher, until recently managing editor of the Chicago Daily News.

Journalism isn't taught strictly in an academic atmosphere at UMC. While graduates spend 75 per cent of their time in liberal arts, science and social science studies, the other 25 per cent is strictly professional training received through serving as reporters, copy readers, photographers and adver-

tising men on the Columbia Missourian, daily and Sunday newspaper of the School; as reporters, writers, photographers and announcers on KOMU-TV, the university-owned television station; and as reporters, writers and announcers on KFRU, privately-owned radio station affiliated with the School. Specialization may be pursued after basic essentials are met.

Majors are offered in news-editorial, advertising, magazine, photojournalism, publishing, and radio-television with professional areas of concentration in agricultural, home economics, science and medical writing, financial and business, and teaching of journalism. Special training is offered through economic and political reporting in Brussels and Washington, in medical science writing in Buffalo and Washington and through "covering" legislative sessions each year of the Missouri General Assembly. Graduate school work leading to master and doctor degrees is available. Summer internship programs are offered in widely divergent sections of the nation.

One of the major events in journalism is the annual Journalism Week to which leaders in all branches of the profession are brought together for a week, climaxed by the awarding each year of Missouri Honor Awards for Distinguished Service in Journalism.

In these days of job scarcities, a placement office helps graduates, old and new, find positions for which they are qualified. Few are the graduates unplaced and job openings in the hundreds usually can be found listed.

FALCON STADIUM

Stadium Information

LOST AND FOUND

If you lose an article while attending a game at Falcon Stadium, check at the main ticket office in the east building or the main concessions office on the top tier of the west side. If you find an article in the stadium area, please turn it in to any of the concession stands, the main ticket office or the main concessions office.

FIRST AID

Trained medical personnel are in attendance at all Air Force home games. In case of any emergency, report it immediately to the head usher in your portal. There are two first aid rooms and two first aid stations located in Falcon Stadium. The rooms are located in the east side building and on third tier of the west side, directly under the press box. The stations are located off the walkways of the first and second tiers in the vicinity of the 50-yard line.

EMERGENCY CALLS

Individuals expecting emergency calls should file their portal section, row and seat number with the command post, located in the east side building. Office number is 472-1151. A call number will then be issued. **No special announcements are made over the public address system except in cases of gravest emergency. Please do not request this service needlessly.**

For natural beauty, Falcon Stadium is hard to surpass. Built into the base of the Rampart Range mountains, the modern facility also is one of the most functional sports structures in the country.

The concrete structure, built in a natural bowl, has 40,828 permanent seats and can hold up to 50,000 spectators with additional temporary bleachers. There is one level of seats on the east side and three tiers of seats on the west, each serviced by two concession stands and restroom areas. All seats are within easy walking distance of the 9,610-vehicle capacity parking lot which surrounds the stadium on three sides.

The stadium is easily accessible from divided U. S. Interstate 25 and the Academy's Stadium Boulevard which leads directly to the parking lot. There is also ample parking space for 300 commercial busses, and a rail siding is located just a few hundred yards from the bowl for special trains.

Today's A-7: A lot more airplane than anyone bargained for.

Its mission is close support and interdiction. Its accuracy is unprecedented.

The Air Force A-7D and Navy A-7E are equipped with an advanced avionics package which includes a central digital computer, an improved Doppler, inertial platform, forward looking radar, projected map display and an eye-level head-up display.

The A-7's systems are so skillfully integrated that it's an easy aircraft to fly. Programmed navigation aids and ordnance releases give the

pilot vital freedom to concentrate on his target and evasive maneuvers.

It can deliver up to 15,000 pounds of mixed ordnance with better than 10-mil accuracy. Destroying hard targets in one-third the number of sorties required with other available systems.

In service, pilots are discovering mission capabilities that weren't even written into the books. So while it's making pilots more versatile and accurate, they are making it a lot more airplane than anyone bargained for.

Air Force Academy Songs and Yells

GO FALCONS

(Fight Song)
 Words by Cadet R. L. Counts
 Melody by Cadet J. C. Vance
 Arrangement by
 A/1c H. Merrick, USAFA Band
 Rev up and go Falcons to the fight,
 For our spirit is high
 Gear up and go Falcons surge ahead
 On the field as in the sky;
 For you will see silver and blue,
 Reign supreme upon the field;
 We will prove that we can't be beaten,
 For the Falcons never yield.

 Air Force Cadets Go!
 Air Force Cadets -
 GO! GO! GO!

THE AIR FORCE SONG

Off we go, into the wild blue yonder
 Climbing high into the sun;
 Here they come zooming to meet our thunder,
 At 'em boys, give 'er the gun!
 Down we dive spouting our flame from under,
 Off with one hell-uv-a-roar!
 We live in fame or go down in flame!
 Nothing'll stop the U. S. Air Force!

SUMMARY OF PENALTIES

(Includes Only Most Common Penalties)

LOSS OF DOWN—Forward pass illegally touched • *Illegal forward pass by offense • *Intentionally grounding forward pass • **Offensive pass interference

LOSS OF 5 YARDS—Delay of game • Exceeding 25-second count • Excess time out • Failure to pause full second in shift • False start • Free kick out of bounds • Illegal forward pass • Infraction of substitution rules • Interference with opponents or ball preceding snap • Offense illegally in motion at snap • Offside • Snapper's position and ball adjustment • Taking more than 2 steps after fair catch • Infraction of scrimmage formation

LOSS OF 15 YARDS—Delay of game at start of half • Butting with helmet or head • Clipping • Defense disconcerting signals • Failure to return ball to official after score • Grasping face mask of opponent • Illegal use of hands • Ineligible receiver downfield • Piling on • Roughing the kicker or holder • Tackling or blocking fair catcher • Tackling out of bounds after ball is dead • Unsportsmanlike conduct (non-contact foul) • Unnecessary roughness (kicking, kneeling, tripping, etc.)

LOSS OF HALF DISTANCE TO GOAL LINE—If penalty exceeds half the distance to goal

OFFENSE FIRST DOWN ON 1-YARD LINE—Defensive pass interference in end zone • Defensive foul behind goal line on running play.

PLAYER DISQUALIFIED—Striking with a fist, extended forearm, elbow or locked hands • Flagrant player fouls

*Plus 5 yards

**Plus 15 yards

OFFENDED TEAM'S BALL AT SPOT OF FOUL—Defensive pass interference • Illegally batting or kicking free ball • Player fouls when ball is free

VIOLATION, BUT NO PENALTY (Does not offset penalty by opponent)—First touching of free kick by kicking team before ball travels 10 yards • First touching of scrimmage kick by kicking team beyond the neutral zone

COLLEGIATE COMMISSIONERS ASSOCIATION

Early in 1939 five college football commissioners established an organization for the purpose of attacking mutual problems. From that small beginning has grown what is now the Collegiate Commissioners Association, its members the chief executive officers and their assistants from the eleven major college conferences from coast to coast. Representing nearly 300 institutions, they range in size from the seven-member Mid-American Conference to the mammoth 190-member Eastern College Athletic Conference.

The CCA's field of interest has broadened greatly since its inception, now encompassing not only football, but all sports on the collegiate program. The members as such give united attention not alone to officiating assignment and rules interpretation, but also to procedures on undergraduate athletic recruitment and eligibility and to the many other facets of intercollegiate sports administration.

Water Polo Begins First Varsity Campaign

Air Force added a new member to its 18 varsity sports when water polo began intercollegiate competition last Friday against Colorado.

Playing on club status last year, coach Jim Maret's Falcons posted a 14-9 record although their schedule included teams already competing as varsity units.

Maret has reason to be optimistic in water polo's first season as only one man was lost through graduation. In addition, a strong contingent of freshmen promise to give the Falcons tremendous depth.

Heading the returnees is team captain and goalie John Pate (Spartanburg, N.C.). Pate learned the basic of water polo through the Academy intramural program and now has three years of experience.

Expected to start at the guard positions are sophomores Rick Pilling (Downey, Calif.) and Kelly Kemp (Long Beach, Calif.). The other guard spot is up for grabs with senior Jay Hampson (Colorado Springs) and junior Jim Thompson (San Jose, Calif.) vying for the position.

Providing a strong outside scoring threat at his forward slot is senior Fred Harburg (Portales, N.M.), who, like Pate, learned the game through intramurals and is a three-year veteran.

Two freshmen who are given a shot at cracking the starting lineup are Ben Phillips (Ioani, Hawaii), a participant in the Pan-American trials and Chuck Holloway (Huntington Beach, Calif.), who should compliment Harburg as an inside scoring threat.

Air Force will play in California tournaments the next two weekends, traveling to San Fernando on Sept. 24-25 for the San Fernando Valley Tournament and Cupertino Oct. 1-2 for the Northern California Open.

Expected to provide the stiffest competition for the Falcons this year are defending district champion Colorado State and powerful New Mexico.

A highlight of the home season will be the USAFA Tournament Oct. 29-30 featuring such teams as Brigham Young, Army and Utah, in addition to CSU and New Mexico.

Next home game for Air Force will be Oct. 15 against Denver.

JOHN PATE, Team Captain

AIR FORCE '70 vs NAVY '63?

Ever wondered how our great Parker-Jennings combination would have scored against Roger Staubach's Middies? It's the kind of "dream" match-up we'll never see played on the field. But *SPORTS ILLUSTRATED* has come up with the next best thing — an amazingly accurate College Football Game that features 32 of the greatest college teams of the past decade. Based on a complete analysis of every play run by each of these teams during their outstanding seasons, the SI College Football Game lets you coach and quarterback your favorites under the most realistic game conditions possible. Since each team's strengths and weaknesses have been realistically integrated into the game, you can enjoy all the strategy, options and suspense of college football and find out what would happen if you were calling your team's offensive and defensive plays. Color-coded Play/Action Charts for the following teams are included:

AIR FORCE '70	MINNESOTA '60	PRINCETON '64
ALABAMA '66	MISSISSIPPI '61	PURDUE '66
ARKANSAS '69	MISSOURI '69	STANFORD '70
ARMY '66	NAVY '63	SYRACUSE '66
DARTMOUTH '70	NEBRASKA '70	TENNESSEE '70
FLORIDA '69	NORTHWESTERN '70	TEXAS '69
GEORGIA '68	NOTRE DAME '66	UCLA '65
GEORGIA TECH '66	OHIO STATE '68	USC '67
LSU '69	OKLAHOMA '67	WASHINGTON '60
MICHIGAN '69	PENN STATE '69	WISCONSIN '62
MICHIGAN STATE '66		YALE '68

The molded plastic playing field features sliding ball and first-down markers, plus offensive and defensive play selection wheels. The scoreboard indicates score, time remaining, quarter and down.

FALCON KICKERS FACE CHALLENGING SEASON

1971 AIR FORCE ACADEMY VARSITY SOCCER SCHEDULE

Date	Time	Opponent	Site
Sept. 11	4:00 p.m.	Wisconsin — Green Bay	Quincy, Ill.—1-2
Sept. 12	3:00 p.m.	Quincy	Quincy, Ill.—1-3
Sept. 17	3:00 p.m.	Cleveland State	Cleveland
Sept. 18	4:00 p.m.	Akron	Akron, Ohio
Sept. 24	3:30 p.m.	Ottawa (Kan.)	USAFA
Sept. 25	11:00 a.m.	Wisconsin — Green Bay	USAFA
Oct. 2	1:30 p.m.	Metro State	USAFA
Oct. 5	4:15 p.m.	Colorado Mines	USAFA
Oct. 8	3:00 p.m.	Denver	Denver, Colo.
Oct. 15	4:00 p.m.	Army	USAFA
Oct. 22	4:00 p.m.	Chico State	USAFA
Oct. 23	1:30 p.m.	Calif. State — Fullerton	USAFA
Oct. 29	1:30 p.m.	South Florida	Tampa, Fla.
Oct. 30	1:30 p.m.	Rollins College	Tampa, Fla.
Nov. 7	1:30 p.m.	Colorado College	Colorado Springs
Nov. 13	1:30 p.m.	Regis College	USAFA
Nov. 20	1:00 p.m.	Colorado State	Ft. Collins

The 1971 soccer team faces one of the most challenging seasons in their history. Highlighting the schedule will be a home game against archrival and perennial power Army. Eleven of the 17 Falcon rivals participated in post-season tournament play last year. New opponents include Akron, Chico State, California State at Fullerton, and Rollins College, all of whom participated in NCAA tournament play, and rapidly improving regional foe, Metro State of Denver.

Air Force will be led by senior forward Dan Narzinski of St. Louis. The Falcons' leading scorer in 1969 with 26 points on 17 goals and nine assists, he was out of action with an illness during most of 1970 but has returned to top form.

Also returning will be senior halfbacks Tom Webb, a three-year starter, and team captain Hugh Parker, both excellent playmakers. Senior fullbacks Frank Janssen and Randy Graham, along with junior Larry Geisse and sophomore John Brockman will round out an experienced defense. Junior goalie Dave Muckley, another St. Louis native, has been impressive in the goal, adding to the Falcons' overall defensive strength. Senior Rich Ferraioli and juniors Scott Parker, Scott Mills, and Vic Powers provide additional depth.

Air Force will participate in two tournaments this season. The Falcons will co-host the annual kick-off tournament with Colorado College and journey to Illinois where they will appear in the Quincy College Tournament meeting Wisconsin at Green Bay and Quincy.

TV FOOTBALL . . . of Rules, Rain and Ratings

by BEANO COOK, ABC-TV Sports

ROONE ARLEDGE

President and Executive Producer
of ABC Sports

On the 28th floor of ABC Television's office in New York, there is a saying which goes, "If you think the network did a good job in picking this season's college football schedule for television, send all congratulatory mail to Chuck Howard, vice-president of program production, and Jim Spence, vice-president of program planning. If you don't like the schedule, blame Roone Arledge, President of ABC Sports."

See, my friend, it really boils down to one person, Arledge. He makes the final decision. Take the 1969 schedule. When he talked to Darrell Royal of Texas and Frank Broyles of Arkansas about playing the first Saturday in December instead of the middle of October, Royal asked, "Why?"

"It will be for the national championship," replied Arledge casually.

"What about Ohio State?" said Royal. In 1968, the Buckeyes swept to the national title and nearly every key player was returning.

"They will lose," said Arledge. "Don't worry about that. Your game will be for No. 1."

Everybody thought Arledge was nuts, including all the pre-season experts who saw no way Ohio State could lose. Well, as the season progressed, it seemed as if Arledge had been wrong and the game between

Texas and Arkansas would be just for No. 2 and for the Southwest Conference title. After Ohio State walloped Purdue on national television, only Michigan remained for the Buckeyes, who were called by some, "the greatest team ever." A reporter asked Arledge what he thought.

"Look, Ohio State plays at Michigan and 100,000 screaming fans will mean the difference."

As Arledge watched the Ohio State-Michigan game on television, he really didn't believe what he saw. "Look, I thought Ohio State would lose, but when it came down to just one game, I had my doubts."

Arledge, Spence and Howard picked the 1971 television schedule for ABC. The National Collegiate Athletic Association Television Committee only verifies that the schedule meets the criteria of the television plan as voted by the members of the NCAA.

In the early fifties, the NCAA wisely formed a Television Committee, which has closely watched the effect live television has on attendance. Many critics, especially sportswriters, criticize the NCAA for not allowing the network to pick any game. Yet, when television was not controlled, attendance declined. The press blames television for killing boxing, but also criticizes the NCAA when it tries to supervise the televising of college games so the live gate won't decline rapidly.

In recent years, the Television Committee has given ABC more flexibility, especially for late-season games. Sometimes Arledge feels frustrated. When he thinks he has the schedule completed, he notices that a team isn't eligible because of previous appearances on the schedule.

"I remember when we called California to request an earlier start for a certain game," recalled Arledge. "After the call, somebody noticed that California already was on the schedule the maximum number of times permitted. Anyway, we were saved when California called back and said it couldn't accommodate our request. I was quite happy over the refusal."

The general public becomes confused over the various rules, but as a guideline, here are some basic ones to remember. The rules start in the even

years. No team can now appear more than four times in two years, or more than three times in one year. No team can appear on national television more than two times in one year. There are no blackouts. There are a few remifications to these rules, such as a team can benefit just once in two years from the wildcard game.

Since this year's schedule came in the odd year, Arledge, Howard and Spence had to check the previous year's schedule to be positive that no team would exceed the limit of appearances for a two-year period. When this trio made the schedule, the national dates were completed first. (There are 12 national games and six regional weekends. Each station receives a total of 18 games.)

Then came the 24 games for the regional weekends. "You run into problems but none as rough as having universities move dates, although sometimes you can't blame an athletic director for not switching a date," said Arledge. "However, on some occasions, we are against the wall and must ask institutions to cooperate. In most cases, the athletic directors have been great."

Via the regional weekend games, ABC fulfilled many of the obligations of the contract, such as including at least 12 independent teams on the schedule, and ensuring the required appearances for each major conference for the two-year period.

"I would rate this year's schedule the most difficult one to make in six years because of the problems we faced late in the season," said Arledge. "Yet, I think we will do well ratings-wise, and will provide games of considerable interest and attractiveness regularly."

Under Arledge's brilliant leadership, viewership of NCAA football reached new peaks in 1970.

"If the large cities could have a snowstorm on two straight Saturdays in September, it would help. And if the national games are closer than they were last year, I think 1971 could be a super year. We are the only people who pray for rain for the entire country every Saturday, except at the site of the TV game.

"When it rains on Saturday, several million more fans watch college football on television, and that's good for ABC, the advertisers and college football."

See This Star in the Falcons' Next Home Game

AIR FORCE vs. WYOMING, Sept. 25, 1971

GARY FOX

**Quarterback
University of Wyoming**

Quarterback and co-captain of the Cowboys, Senior Gary Fox (5-11, 197) ranked third in total offense for Wyoming last year even though he played only three games. A head injury in the Arizona State game ended his year early. In his 13-game career he has completed 95 passes for 1,097 yards and seven TD's.

Fox began his collegiate career by coming off the bench as a sophomore in 1969 against the Falcons and completing 10 of 11 passes for 68 yards and a touchdown to lead Wyoming to a 27-25 win.

Salute to the men of the U.S. Air Force Academy and the U.S. Air Force

AWACS. Eight-engine version of Boeing 707-320 shown with large radome designed to house surveillance radar antenna. AWACS fleet would serve as an Airborne Warning and Control System, for both tactical and air defense forces.

Boeing 747 superjet, winner of Collier Trophy as aviation event of the year, has carried 15 million passengers flying for 26 airlines. Freighter version, ready soon for its first flight, can carry 125 tons of cargo.

BOEING

A GREAT RUNNER.

You expect a little car to be a good sprinter. Nimble, light on its feet, fine for short runs around town.

Vega is all that.

But what sets Vega apart is that it's one little car that's good on long runs too.

One reason is its relatively large 140-cubic-inch overhead cam engine. It can cruise comfortably at turnpike speeds without straining, and with power to spare.

Vega is built low to the ground, and wide, so it takes curves without a lot of lean and hangs onto a windy highway like it weighed a whole lot more.

The steering is easy. Yet firm and reassuring on straight stretches.

What we're saying is, for an economy car, Vega sure feels a lot like a sports car.

Get into one soon and see. It'll give you a good run for your money.

Great runner meets great runner. Former Heisman Trophy winner O.J. Simpson behind the wheel of a Vega Hatchback Coupe.

Buckle your seat and shoulder belts.
It's an idea you can live with.
